Reviewing Note Values

GAME INSTRUCTIONS

Players: 2+

Supplies Needed: One game board for every 2 players, 5 rhythm dice, colored tokens

Goal: To be the first player to cover all the numbers on their side of the board

Play: Players chose one side of the board and try to add a token to each space labeled 1-12. The first player rolls 1-5 rhythm dice, adds up the total number of beats on the dice and places a token on that number on their side of the game board. For example, if the player decides to roll 1 dice and it lands on a quarter note, the player puts a token on the number 1 spot on their side of the board.

The same player rolls again and continues to fill up spots. They can choose to roll any number of dice 1-5 depending upon the number(s) they are trying to get. Their turn continues until the player rolls beats that are equal to a number they have already covered on their game board or if the number of beats rolled is over 12. Play then goes to the next player.

The game continues until one player successfully covers all 12 spots on their side of the game board.
