2 Players

The deck of 76 cards includes sets of notes on the bass & treble clefs and notes on the keyboards all in blue and green.

Shuffle the cards and divide them into two equal piles, one for each player with both piles in reach of both players.

Each player takes the top 3 cards from his pile to form a hand. Players may look at the cards in their hand.

Players simultaneously turn over a card from their pile and place it in the center of the table. The game begins!

-2-

Without taking turns, players race to play cards from their hand, face up, on either of the center piles. The card must pair or match with the note on the staff or on the keyboard or must match the color.

As cards are played, players refill their hand – up to 3 cards - by taking from their own draw pile.

The game continues until one of the players is completely out of cards from his hand and draw pile.
